SEASONAL CROP OF WHEAT—FIRST REPORT.

[On an average of the five years ending 1920-21 the area under generally in the Madras Presidency has represented about 17-8 per cent of the total area under generally in British India.]

The area sown with generally up to the end of July 1922 is estimated at 201,706 acres which is about 9 per cent more than the estimate of 186,468 acres made on the corresponding date last year. The increase is fairly general except in the Deccan where there were no adequate sowing rains and in Coimbatore owing to want of rain in March and April when the crop is sown.

The early sown crops are reported to be doing well and the yield will be up to average. The late sown crops are in need of more rain.

Details by districts are given below:—

Sowings to date less than in last year and the average. Standing crops fair but crops in the non-delta irrigated areas are failing or have failed. In unirrigated waste crops are in need of rain. Harvested taluks in Kaveray taluk; others fair. Prospects generally poor. Rain urgently needed for the irrigated crops.

## CHIDOLEPUT.

Water-supply sufficient. Transplanting paddy and ragi in parts and sowing paddy in all taluks except Ponnur. Sowings to date more than in last year for dry crops. Standing crops fair to good. Harvested generally. Outlook fair. Prospects fair.

## SOUTH ARCO.

Water-supply insufficient except in Chidambaram and Tridhanabalam and except generally under wells. Sowing paddy, sorgha, ragi, and groundnut in parts. Standing crops fair. Harvested groundnut; others fair. Prospects fair.

## CHITTUR.

Water-supply sufficient in wells except in parts of these taluks and three divisions and insufficient in other portions. Transplanting paddy and sowing sorgha and ragi in parts. Standing crops mainly under wells generally fair except in parts of Chittur taluk and Pongalur division where sorgha and ragi are reported to be withering for want of sufficient supply in wells. Dry crops in places not protected by wells will be a failure unless there is good rain shortly.

## NORTH ARCO.

Water-supply insufficient except generally under wells. Transplanting paddy and ragi and sowing groundnut. Sowings to date 50 per cent more than the average and about 40 per cent more than in last year. Standing crops good except groundnut which is withering in parts of Virudhun taluk. Harvested generally; others poor. Prospects generally fair. Want of rains, badly felt.
